FINE WINES OF VERONA

Olio Extra Vergine di Oliva from biological agriculture

Our Organic Extra Virgin Olive Oil is the right and more healthy choice if you want to bring on your table all the flavor and quality of a precious product, carefully obtained from olives (varietal Drissar and Leccino) and grown without the use of chemical agents, as the control authority certifies.

Our “Olio Extra vergine d’oliva”, from biological agriculture shows a deep green color with golden shades reminding the consumer of olive trees grown on sunny hills.

Sometimes the limpidity of this oil shows itself as veiled by olive paste small pieces: a real guarantee of cold-grinding by traditional millstones. Its flavour is fruity, full but gentle, able to make, of all the tastes, the richest.
